How Do I Download PCS Pro? Follow

You can download PCS Pro here:

http://play-cricket.com/updates3

Important information regarding initial set up below

What do I need to be able to use PCS Pro?
You will need several things to use the software:
• A Laptop with the minimum Windows 7 Service Pack 1.
• A Play-Cricket Account (for recreational scoring) or an NV Play Account (for first class scoring) (Optional).
• Scorer Rights to be able to upload results to Play-Cricket and live score (Optional).
• Internet connection (only needed to download the fixture and upload the result on your device).

Please contact the helpdesk at play.cricket@ecb.co.uk

I have a Mac, can I run PCS Pro on it?

The software works on both Windows and Mac, however in order to run on a Mac you'll require Parallels Desktop or similar https://www.parallels.com/uk/products/desktop/
At the ECB we are committed to developing PCS Pro and may consider developing a Mac version in the future.

Will PCS Pro run on Windows 10 S?

PCS Pro will not run on Windows 10 S in its current form. Windows 10 S is designed to only allow apps to be installed from the Windows Store.

Users can upgrade to Windows 10 Pro for a small cost. If there is significant demand for Windows 10 S support please get in touch at play.cricket@ecb.co.uk and we will evaluate this for a future release.
